

# Shubham Tiwari

PhD student, University of Washington

 sbhtwr.github.io    @ tshubham@cs.washington.edu     github.com/sbhtwr     Google Scholar  
☎ +1 (206) 853-0284

## Education

**University of Washington, Seattle** Sept 2023 - Present  
Ph.D. in Computer Science (*ongoing*)  
Advisors: Simon Peter, Ratul Mahajan

**Birla Institute of Technology and Science (BITS), Pilani** Aug 2016 - July 2021  
B.E. Computer Science and M.Sc. Mathematics, CGPA: 8.52  
Thesis: *Data-Driven Network Simulation with iBox*

## Experience

**Microsoft Research, Bangalore** Aug 2021 - Aug 2023  
*Research Fellow with Debopam Bhattacharjee, Venkat Padmanabhan*  
Projects: LEO Satellite Networks (LEOScope), Data-Driven Network Simulation (iBox)

**Microsoft Research, Bangalore** Jan 2021 - July 2021  
*Research Intern with Venkat Padmanabhan, Nagarajan Natarajan*  
Project: iBox

**VMware, Bangalore** Aug 2020 - Dec 2020  
*Intern, xLabs with Jayneel Gandhi*  
Project: Page-table Replication (Mitosis)

**Samsung Research, Bangalore** May 2020 - July 2020  
*Research Intern with Shital Bhatia*  
Project: Cellular Network Planning

**Software-Defined Networking Lab, BITS Pilani** Jan 2019 - Dec 2019  
*Research Assistant with K. Hari Babu*  
Project: Passive Estimation of Link Latency (qMon)

## Publications

C=Conference, J=Journal, P=Preprint

- C.1 Boosting Application Performance using Heterogeneous Virtual Channels: Challenges and Opportunities** [link]  
Talal Touseef, William Sentosa, Milind Kumar Vaddiraju, Debopam Bhattacharjee, Balakrishnan Chandrasekaran, Brighten Godfrey, Shubham Tiwari  
22<sup>nd</sup> ACM Workshop on Hot Topics in Networks **HotNets'23**
- P.1 T3P: Demystifying Low-Earth Orbit Satellite Broadband** [link]  
Shubham Tiwari, Saksham Bhushan, Aryan Taneja, Mohamed Kassem, Cheng Luo, Cong Zhou, Zhiyuan He, Aravindh Raman, Nishanth Sastry, Lili Qiu, Debopam Bhattacharjee  
Working paper **arXiv'23**
- C.2 Simulating Network Paths with Recurrent Buffering Units** [link]  
Divyam Anshumaan, Sriram Balasubramanian, Shubham Tiwari, Nagarajan Natarajan, Sundararajan Sellamanickam, and Venkata N. Padmanabhan  
37<sup>th</sup> AAAI Conference on Artificial Intelligence **AAAI'23**

- C.3 Data-Driven Network Path Simulation with iBox** [link]  
 Sachin Ashok, Shubham Tiwari, Nagarajan Natarajan, Venkata N. Padmanabhan, and Sundararajan Sellamanickam  
*ACM SIGMETRICS / IFIP PERFORMANCE 2022* **SIGMETRICS'22**
- J.1 qMon: A method to monitor queueing delay in OpenFlow networks** [link]  
 Sandhya Rathee, Shubham Tiwari, K Haribabu, and Ashutosh Bhatia  
*Journal of Communications and Networks* **JCN'22**

## Projects

- BlendMesh: Optimizing Service Mesh Deployments** Oct 2023 - Present  
 Advisors: Simon Peter, Ratul Mahajan  
 > Studying various service-mesh deployments to identify performance bottlenecks and the trade-off's involved.
- LEOScope: Enabling Experimentation Across Low-Earth Orbit (LEO) Satellite Networks** July 2022 - Present  
 Advisors: Debopam Bhattacharjee, Venkat Padmanabhan [code]  
 > Leading an effort with **Azure Space**, **MSRA**, and academic collaborators to build a platform of a global scale for experimentation across Low-Earth Orbit Satellite networks.  
 > Driving the effort through engineering challenges such as platform architecture, implementation of experiment scheduler, executor, and the central orchestrator.  
 > Initiated large-scale measurements based on ping and iperf to characterize satellite network paths.
- iBox: Internet in a Box** Jan 2021 - June 2022  
 Advisors: Venkat Padmanabhan, Nagarajan Natarajan [website]  
 > Built a data-driven network simulator that uses data to recreate end-to-end behavior of a network path.  
 > Leveraged a combination of internet measurement data and ML models to capture the impact of complex network phenomena such as cross-traffic and packet reordering.  
 > Integrated iBox with ns-2, ns-3, netem and **Microsoft Teams's** in-house network simulator.  
 > Resulting papers published at **SIGMETRICS'22** and **AAAI'23**.
- qMon: Passive Delay Monitoring in SDNs** Jan 2019 - Dec 2019  
 Advisor: K. Hari Babu [paper] [code]  
 > Devised **qMon**, a scalable latency monitoring technique with zero data plane footprint.  
 > Developed an Open vSwitch based prototype to fetch queue length information using OpenFlow and passively estimate link latency.  
 > Evaluated qMon on a physical testbed under various traffic scenarios.  
 > Resulting paper published at **JCN 2022**.
- Mitosis: Enabling Page-Table Replication in ESXi** Aug 2020 - Dec 2020  
 Advisor: Jayneel Gandhi  
 > Implemented page-table replication (**Mitosis**) in VMware's core virtualization product – ESX.  
 > Developed prototypes to disambiguate the design and code needed to support page table replication in the ESX kernel.  
 > Conducted workload profiling to estimate the performance benefits of page-table replication; realized gains of upto **17%** in workload execution time.

## Miscellaneous

- > Awarded a grant of 50,000 INR by AUGSD, BITS Pilani for developing a miniature autonomous driving vehicle.
- > Demonstrated iBox at TAB – MSR India's annual technical event.
- > Presented iBox at SIGMETRICS'22. [video]
